

【日本生化学会】2015年 JB論文賞 受賞論文

受賞論文 1 Loss of *Tsc1* accelerates malignant gliomagenesis when combined with oncogenic signals

Daisuke Yamada, Takayuki Hoshii, Shingo Tanaka, Ahmed M. Hegazy,
Masahiko Kobayashi, Yuko Tadokoro, Kumiko Ohta, Masaya Ueno,
Mohamed A.E. Ali and Atsushi Hirao
J. Biochem. 2014;155(4):227–233 doi:10.1093/jb/mvt112

受賞論文 2 Ryk is essential for Wnt-5a-dependent invasiveness in human glioma

Mika Habu, Hirofumi Koyama, Michiko Kishida, Masayuki Kamino, Mikio Iijima,
Takao Fuchigami, Hiroshi Tokimura, Masahiro Ueda, Mai Tokudome,
Chihaya Koriyama, Hirofumi Hirano, Kazunori Arita and Shosei Kishida
J. Biochem. 2014;156(1):29–38 doi:10.1093/jb/mvu015

受賞論文 3 aPKC λ maintains the integrity of the glomerular slit diaphragm through trafficking of nephrin to the cell surface

Daisuke Satoh, Tomonori Hirose, Yutaka Harita, Chikara Daimon,
Tomonori Harada, Hidetake Kurihara, Akio Yamashita and Shigeo Ohno
J. Biochem. 2014;156(2):115–128 doi:10.1093/jb/mvu022

受賞論文 4 Centromeric histone variant CENP-A represses acetylation-dependent chromatin transcription that is relieved by histone chaperone NPM1

Jayasha Shandilya, Parijat Senapati, Fabienne Hans, Hervé Menoni,
Philippe Bouvet, Stefan Dimitrov, Dimitar Angelov and Tapas K. Kundu
J. Biochem. 2014;156(4):221–227 doi:10.1093/jb/mvu034

受賞論文 5 The staphylococcal elastin-binding protein regulates zinc-dependent growth/biofilm formation

Makoto Nakakido, Chihiro Aikawa, Ichiro Nakagawa and Kouhei Tsumoto
J. Biochem. 2014;156(3):155–162 doi:10.1093/jb/mvu027

受賞論文 6 Trimming of glucosylated *N*-glycans by human ER α 1,2-mannosidase I

Jun-ichi Aikawa, Yoichi Takeda, Ichiro Matsuo and Yukishige Ito
J. Biochem. 2014;155(6):375–384 doi:10.1093/jb/mvu008
