

Meet the Symposists

Making our meeting more international is a key theme this year, and each day's symposium will include invited speakers abroad, mainly junior principal investigators. Yet the limited time available for the symposium will provide little opportunity for participants to interact with the speakers who have come from overseas.

Therefore we have added a "Meet the Symposists" feature to the meeting, with a special booth set up in the poster and exhibition area in the Exhibition Hall. On the first, second and third days of the meeting, during the poster presentation and discussion period (16:00~19:00), the symposists from the day's symposium will gather at the "Meet the Symposists" booth. Don't miss these opportunities to speak directly with symposists from overseas as well as prominent Japanese researchers.
