

Poster Presentation

Poster Presentation 01 September 22 18:00-19:00 Room 4 (Reception Hall 1)

Aging

Chairperson : Ichiro Shiojima (Kansai Medical University)

P01-1 Nucleolus-mediated Cellular Senescence is involved in Heart Failure

Takuya Kumazawa (Cardiovascular Medicine, Nara Medical University, Japan)

P01-2 Amino acid substitution of Werner gene is responsible for cardiac aging

Takahiro Kamihara (Department of Cardiology, Nagoya University Graduate School of Medicine)

P01-3 Endothelial-SASP induces premature senescence in adipocytes and disrupts metabolic homeostasis

Agian Jeffilano Barinda (Clinical Pharmaceutical Laboratory, Kobe Pharmaceutical University / Cardiovascular Medicine Division, Kobe University)

P01-4 Endothelial cell senescence exacerbates heart failure due to pressure-overload

Dhite B Nugroho (Department of Internal Medicine, Division of Cardiovascular Medicine, Graduate school of medicine, Kobe University / Departement of Internal Medicine, Gadjah Mada University)

P01-5 Repetitive Postprandial Combined Metabolic Spikes Induce Premature Aging of Bone Marrow

Keita Horitani (Department of Medicine II Kansai Medical University)

P01-6 Visceral adipose tissue potentiates cardiac dysfunction in aging and obesity

Daigo Sawaki (INSERM U955, University of Paris East Créteil)

P01-7 Osteoprotegerin as a protective factor in the aging heart

Toshihiro Tsuruda (University of Miyazaki)

P01-8 Endothelial cell senescence is involved in the progression of atherosclerosis

Sakiko Honda (Department of Cardiovascular Medicine, Graduate School of Medical Science, Kyoto Prefectural University of Medicine)
