

**Poster Presentation 06** September 22 18:00-19:00 Room 4 (Reception Hall 1)**Cardiac Hypertrophy and Function2**

Chairperson : Noboru Fujino (Pharmaceutical and Health Sciences, Kanazawa University)

**P06-1** Analysis of molecular dynamics of TN-C in Kawasaki disease using a murine model induced by FK565

Daiki Yamamoto (Department of Pathology and Matrix Biology, Mie University Graduate School of Medicine)

**P06-2** Cocoa Bean Polyphenols Inhibit Pressure Overload-Induced Cardiac Hypertrophy and Heart Failure

Nurmila Sari (Division of Molecular Medicine, Graduate School of Pharmaceutical Sciences, University of Shizuoka)

**P06-3** Guanylyl Cyclase-A Signaling Attenuates the Deleterious Salt Effect on Mineralocorticoid Receptor

Hitoshi Nakagawa (Nara Medical University)

**P06-4**  $\alpha$  1A-adrenergic receptor suppresses cardiac hypertrophy in pregnancy-associated hypertensive mice

Chulwon Kwon (Graduate school of Life and Environmental Sciences, University of Tsukuba, Tsukuba, Ibaraki, Japan)

**P06-5** Left Ventricular Global Longitudinal Strain Values in Healthy Filipino Adults: Cross sectional Study

Julius Caesar de Vera (St. Luke's Medical Center-Global City)

**P06-6** Right Ventricular Strain in Healthy Adult Filipinos A Retrospective Cross Sectional Pilot Study

Julius Caesar de Vera (St. Luke's Medical Center-Global City)

**P06-7** Change of exhaled acetone concentration levels in patients with acute decompensated heart failure

Tetsuro Yokokawa (Department of Cardiovascular Medicine, Fukushima Medical University)
